

DAY 2 INTERNSHIP REPORT

Python Backend Development Internship

Student Name: Benatic Rithan B

Institution: Kalaighnar Karunanidhi Institute of Technology (KIT), Coimbatore

Department: Computer Science and Engineering

Date: 09 June 2026

GitHub Repository

<https://github.com/Benatic705/python-backend-internship>

Topic: Python Fundamentals Refresher

Topics Covered

- Functions
- Modules
- Packages
- Virtual Environments
- Pip Package Manager

Assignment

Utility Toolkit Project

Project Files Created

- calculator.py
- converter.py
- main.py

Activities Completed

- Learned Python Functions and reusable code concepts.
- Created reusable Python Modules.
- Understood Package structure and organization.
- Learned Virtual Environment creation and usage.
- Explored Pip Package Manager basics.
- Developed the Utility Toolkit Project.
- Imported modules and executed the application successfully.

Program Output

Addition: 15

Temperature: 77.0

Learning Outcomes

- Improved understanding of Python Functions.
- Learned modular programming and code reusability.
- Gained experience creating reusable Python modules.
- Understood package organization concepts.
- Learned basics of Python environment management.

Status: DAY 2 COMPLETED SUCCESSFULLY ■
